

Bearings Limited has partnered with Silverthin Bearings to provide a full range of Thin Section and Slewing Ring Bearings to meet your specialty bearing needs.

Thin Section Bearings

Thin section bearings help reduce total cost in a system by allowing for design efficiency over standard bearing sizes. Used in applications in which the space and weight requirements of a system are major factors in the overall design and manufacturing cost.

- ARO - Angular Contact Bearings**
- CPO - Radial Contact Bearings**
- XPO - 4-Point Contact Bearings**
