

Product Highlights

Rubber Mounted Pressed Steel Pillow Blocks

Rubber Mounted Pressed Steel RPB Pillow Blocks & Rubber encased RABR Inserts are designed for use in the HVAC industry.

RPB units consist of a two piece separable pressed steel housing (PB Housing) with a light duty ball bearing insert surrounded by a conductive rubber ring (RABR insert) to help eliminate noise and vibration.

Units are available with flush inner ring bearings constructed with full cover metal shroud seals and eccentric (self locking) collar. They are also available with dual set screw bearings (S suffix).

RABR inserts are also available as replacement bearings or for applications where they are used without the housing. Current stock sizes are 1/2", 17mm, 3/4", 20mm, 7/8", & 1" bores.
