PRECISION ROLLER CHAIN

TRITAN ADVANTAGES

TRITAN Power Transmission Components are manufactured with the most technologically advanced machinery, producing world-class products. TRITAN uses heat-treated select alloy steel, advanced quality control, and testing systems to ensure the highest quality.

Experience what higher standards and true commitment to your satisfaction can bring to all your precision power transmission component requirements. See for yourself just what the TRITAN difference is.

- Link plates have increased waist width to combat fatigue
- Ball burnished to assure maximum resistance to fatigue
- Link plates and rollers are shot peened, providing greater strength
- All plates, rollers, and pins are heat treated
- All chain is run in and pre-stressed to prevent initial elongation and fatigue
- All chain is packaged in sealed pouches, then packed in heavy-duty laminated boxes
- Certified to ISO 9001 standards
- Conforms to ANSI B-29-1, American Petroleum Institute, DIN 8196, JIS1801, and BS Certification.
